DETAILED ACTION

Response to Amendment

1. Claim 35 has been amended. Claims 1-34 and 36-44 have been cancelled. Claim 45 has been added. Claims 35 and 45 are pending.
2. The 35 U.S.C. 112, first and second paragraph, rejections to claim 35 is WITHDRAWN in view of the Amendment.

Response to Arguments

3. Applicant's arguments, see Remarks on pages 3-4, filed 01 May 2006, with respect to claim 35 have been fully considered and are persuasive. The objection under 35 U.S.C. 132(a) for introducing new matter in the Amendment filed on 10 August 2005 has been withdrawn.

Drawings

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 35 and 45 are rejected under 35 U.S.C. 102(e) as being anticipated by Mault et al, US 2002/0026937 A1 ("Mault").

Claims 35 and 45: Mault teaches a method for monitoring small quantities of glucose in exhaled breath, which are related to blood glucose levels, due to processes e.g. within the lungs by disposing a glucose sensor 23 in the breathing flow path (breath sampling tube) (see paragraph [0077]). Furthermore, Mault teaches that it is desirable to know the composition of the exhaled gas in order to diagnose and treat a predetermined medical condition in an individual, such as diabetes (see paragraph [0004]). Administering insulin is the conventional treatment for diabetic patient.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2003/0208133 A1 additionally teaches the subject matter of the Applicant's claims. The Examiner suggests reviewing these patents before responding to the present Office Action.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
